## Objective:

I am seeking a leading Oracle Application Development role that requires a quick grasp of large data sets, disaster recovery experience, a strong understanding of PL/SQL, and excellent problem-solving skills.

## Experience:

**The Planet Internet Services, Inc.:** Manager of Application Development  
<http://www.theplanet.com>  
(July 2004 - Present)

The Planet is an Internet infrastructure provider that manages 25,000 web-servers on behalf of over 8,000 customers around the world.

- Develop and maintain applications for automating web server configuration/deployment, managing inventory/customer accounts, and performing large-scale data backup/disaster recovery
- Build and manage data warehouse activities; develop reporting tools to assist executive leadership with identifying sales opportunities and monitoring product trends
- Recruit and manage members of development team. Allocate development resources among high volume of concurrent initiatives.
- Design and develop normalized data structures for use in an Oracle database (8i and 10g) environment, and maintain code-base using subversion.
- Maintain indexes, table spaces, data integrity and normalization in Oracle. Write functions, procedures, packages in Oracle as needed.
- Design and develop web applications in PHP 5 for internal tools and for customer-facing toolsets.
- Communicate upcoming projects to Sales & Marketing groups and coordinate the release of external communications (on the web).
- Write numerous reports (SQL mostly) for all departments in the company. These include but are not limited to: auditing, inventory control, quality assurance, auditing, Churn reporting, and net sales.

## Experience: (Continued)

### **ALLTEL Corporation: Corporate Systems / Information Services** (December 11, 2000 - May 24, 2004)

- Performance tuning, monitoring, administration, and development of Oracle® SQL functions, procedures, packages, indexes, and constraints, ensuring normalization.
- In accordance with Sarbanes-Oxley Corporate governance, detailed application specifications and business logic for internal and external auditing purposes.
- Heavy web-development in PHP and Cold Fusion (CF5 & CFMX) and systems administrator for production web-servers. Also maintained code base using Microsoft Visual Source Safe.

### **Louisiana Tech University: Institute for Micromanufacturing** (November 1998 - May 2000)

- Assigned to 3-dimensional High-pressure laser chemical-vapor deposition team. Developed software to control the hardware connected to the laser.
- Maintained all computers. Applied all necessary software and hardware upgrades and fixes. Provided Auditing as needed on windows-based machines.
- Setup a networked lab of computers for the teaching and engineering staff in the Institute, and created a website for the institute spotlighting the faculty therein.

### **Bernice Community Rehabilitation Hospital:** (May 1998 - November 1998)

- Replaced faulty hardware in computers.
- Provided Cost-analysis reports for new systems.
- Revised and edited "Policy and Procedures" documents for the administration of the facility.
- Provided an electronic means of ordering food for all staff and patients. Coordinated this with Ben E. Keith.

## Proficiencies:

- **Oracle:** Advanced knowledge of SQL & PL/SQL including the data dictionary. Develop advanced applications and perform application DBA roles, such as all creating all objects (tables, foreign keys, primary keys, triggers, sequences, and constraints.)
- **Reporting:** Excellent report-writing skills using Oracle. I have overseen the deployment of OLAP systems for use in a data warehouse. I am constantly tasked to provide reports to Executives on any manner of data including trending analysis, and daily statistical analysis.
- **PHP:** Advanced development of websites using this server-side scripting language. Can provide very powerful, database-driven, real-time web applications. Have used PHP in conjunction with MySQL, Oracle, SyBase, and SQL Server.
- **Cold Fusion:** Advanced ColdFusion 5 & CFMX development using the RAD and fusebox methodologies in the Object Oriented programming style.
- **HTML:** Advanced knowledge of this medium as a presentation layer. Many years in development of websites with conceptual understanding of the graphical user interface as well as the user experience.
- **Redhat:** Package and application installation. Compiling sources to binaries. Installing and maintaining Apache with PHP, Zend, and Oracle support, as well as LAMP (Linux, Apache, MySQL, Perl, PHP, and/or Python). Installation, services configuration, system maintenance, auditing, cronjob installation, web server installation and maintenance. Database installation.

## Education:

Bachelor of Science in Computer Information Systems  
College of Business  
Louisiana Tech University  
Ruston, Louisiana  
(November 2000)

## Honors:

- Louisiana Tech University Academic Scholarship
- Davison Transport Academic Scholarship
- Louisiana Tech University Music Performance Scholarship
- John Phillip Sousa Award for Musical Excellence

## Associations:

- Association of Information Technology Professionals
- Business Students Association
- Louisiana Tech University Marching Band
- Louisiana Tech University Jazz Ensemble
